Located on the first floor at the garden side of the house this 'star of the show' Deluxe bedroom has stunning views across the entire grounds.

Historically the 'Ladies' bedroom, this room is naturally light and feels classic yet modern, we like to call it 'Couture'.

The heritage of the room is shown within original wall panelling, high panelled ceilings and large intricate leaded windows with a peaceful garden window seat.

The name is taken from Kingsland road in east London, an area full of experiences, vibrancy and likeminded creatives. The room design features a super-king half tester bed with bespoke wood turnings made from old Yew trees that once stood in the grounds, a seating area of Victorian furniture and free standing cast iron bath that sits next to the window seat. The bathroom boasts a classic large washstand, walk in shower and a fully enclosed loo.
